

Kitasato flasks

Code PJH001, PJH002, PJH003, PJH004

- Endo Glassware's Kitasato flasks are robust, thick-walled flasks made of excellent physical and chemical resistance borosilicate glass.
- Widely used in chemistry and biology laboratories, they feature a side arm for connection to a vacuum pump or water aspirator and can be used with various types of funnels for rapid filtration of solutions.
- They also have approximate graduation markings and a large labeling surface in white.
